Diagram illustrating the structure of the 1000 Genomes Project data, showing the distribution of data across various genomic regions and their associated labels:

- SFB** (Sexual Fruiting Body) is the root region.
- SOR** (Sexual Organ Reproductive) and **SEP** (Sexual Organ Primordium) are the primary branches.
- SOR** further branches into **BFR** (Bacterial Fruiting Body) and **Jumbo**.
- SEP** further branches into **Lux** and **ASR** (ASR).
- BFR** branches into **SAT** (SAT) and **CF** (CF).
- Jumbo** branches into **CC** (CC).
- Lux** branches into **ASR** (ASR).

The diagram shows the distribution of 1000 Genomes data across these regions, with the data being organized into a hierarchical structure.

 BFR
